ADAPTIVE & INCLUSIVE TRAINER (AIT) CERTIFICATION COURSE

The **AIT certification course** is an assessment-based certification course that provides a comprehensive education in adaptive fitness methodology, risk management, exercise adaptations, and whole health programming. Graduates learn and practice procedures that will enable them to conduct safe and effective fitness training for a wide spectrum of people with disabilities, while also providing an inclusive setting using universal design principles. Graduates earn the title of certified **Adaptive & Inclusive Trainer (AIT)** by completing the required coursework and passing the certification exam.

COURSE LEARNING OBJECTIVES

After completing this course, graduates will be able to:

- Apply safe and effective adaptive and inclusive fitness training principles and methods.
- Communicate effectively using multiple methods and appropriate disability terminology and adaptive fitness nomenclature.
- Identify common and individualized safety risks and implement sufficient risk mitigation policies and strategies to maximize trainee safety.
- Identify and utilize common adaptive equipment (prosthetics, orthotics, wheelchairs, specialized fitness and sports devices, and more) and understand their effects on movement and task accomplishment.
- Integrate with the trainee's whole health support team by understanding the trainer's role in coaching people with temporary impairments and permanent conditions.
- Write and analyze workout programming for temporarily impaired and permanently adaptive trainees using any preferred fitness methodology.
- Create and modify exercises to meet the individualized needs and constraints of trainees.
- Plan and execute training sessions for one-on-one clients and group fitness.
- Conduct introduction onboarding for new trainees.
